

PARC EGLOS - MATHS SCHEME OF LEARNING

At Parc Eglos we use the White Rose [Schemes of Learning](#) which provide yearly frameworks that break down what children need to learn during each week of each term to master the learning objectives laid out by the National Curriculum. We use resources that are aligned with the White Rose Maths frameworks which are designed to be enjoyable, engaging and varied, to help pupils develop a love of learning and work towards mastery.

What we really like about the White Rose Maths is their approach to teaching maths. At the heart of their resources and frameworks is the motto "Everyone Can Do Maths: Everyone Can!" — a slogan that we wholeheartedly agree with!

White Rose supports us to help children work towards maths mastery and change attitudes towards this subject, encouraging a [growth mindset](#) in both teachers and learners. Adopting a White Rose Maths approach to teaching means we make sure all of our children have the same opportunities to learn and the support they need to fully grasp concepts.

The philosophy behind White Rose Maths also focuses on making maths fun for children and helping them to find enjoyment in number problems. Because when children are engaged in learning and enjoying maths, [that's when lessons really sink in](#) and deep learning happens.
